These developments clearly indicate that the new technology is not only being adopted by the industry but also by the government. The government is now actively involved in the development and deployment of the technology, which is a significant step forward for the industry.

Abstract: The authors review studies of the effects of the 1994-1995 flu pandemic on the health care system. The authors conclude that the health care system was able to cope with the pandemic, but that there were significant challenges. The authors recommend that the health care system should be prepared for future pandemics by improving communication, training, and resources.

Topic	Subtopic	Concept	Definition	Notes
Mathematics	Algebra	Equation	A mathematical statement that asserts the equality of two expressions, often involving one or more variables.	
Science	Physics	Force	A push or pull upon an object that causes it to accelerate.	
History	World War II	D-Day	The Allied invasion of Normandy on June 6, 1944, during World War II.	
Language	Grammar	Noun	A word that represents a person, place, thing, or idea.	
Art	Painting	Brushstroke	A mark made by a brush on a surface, often used in painting.	
Music	Instrument	Piano	A musical instrument consisting of a series of strings that are struck by hammers.	
Health	Medicine	Diagnosis	The process of identifying a disease or condition based on symptoms and test results.	
Technology	Computer	Software	Programs and data that run on a computer system.	
Environment	Nature	Ecosystem	A community of living organisms interacting with their physical environment.	
Sports	Football	Goalkeeper	A player whose role is to prevent the opposing team from scoring goals.	
Business	Marketing	Target Audience	A specific group of people that a company aims to reach with its marketing efforts.	
Education	Teaching	Lesson Plan	A detailed outline of what to teach, how to teach it, and how to assess student learning.	
Psychology	Behavior	Conditioning	A learning process that occurs through associations between stimuli and responses.	
Philosophy	Logic	Argument	A series of statements or propositions that are intended to establish the truth of a conclusion.	
Geography	Map	Latitude	An imaginary line on a map that runs east-west, measuring distance from the equator.	
Art History	Painting	Renaissance	A period of European history and art that began in Italy in the 14th century and lasted until the 17th century.	
Science	Physics	Gravity	A force of attraction that exists between all objects with mass.	
History	World War II	Atomic Bomb	A nuclear weapon that was first used on Hiroshima and Nagasaki in August 1945.	
Language	Grammar	Verb	A word that expresses an action, state, or occurrence.	
Art	Painting	Color Theory	The study of how colors interact and how they can be used to create visual effects.	
Music	Instrument	Harmony	The combination of different musical notes played simultaneously.	
Health	Medicine	Vaccine	A biological preparation that provides immunity to a particular disease.	
Technology	Computer	Hardware	The physical components of a computer system, such as the monitor, keyboard, and mouse.	
Environment	Nature	Biodiversity	The variety of life and the different ecosystems that support it.	
Sports	Football	Pass	A move in football where a player kicks the ball to a teammate.	
Business	Marketing	Brand	A name or symbol that identifies a product or company.	
Education	Teaching	Classroom Management	The strategies and techniques used by a teacher to maintain order and facilitate learning.	
Psychology	Behavior	Observation	The process of watching and recording behavior in a systematic way.	
Philosophy	Logic	Premise	A statement or proposition that is assumed to be true and is used as a basis for reasoning.	
Geography	Map	Longitude	An imaginary line on a map that runs north-south, measuring distance from the prime meridian.	
Art History	Painting	Impressionism	A style of painting that emerged in France in the late 19th century, focusing on light and color.	
Science	Physics	Energy	The capacity to do work or produce heat.	
History	World War II	Concentration Camp	A place where people are imprisoned and often subjected to forced labor or persecution.	
Language	Grammar	Adjective	A word that describes or modifies a noun.	
Art	Painting	Composition	The arrangement of elements in a painting to create a balanced and visually appealing work.	
Music	Instrument	Tempo	The speed or rate at which a piece of music is played.	
Health	Medicine	Prescription	A written order from a healthcare professional for a patient to take a specific medication.	
Technology	Computer	Operating System	The software that manages the hardware and provides a platform for other applications.	
Environment	Nature	Conservation	The protection and preservation of the natural environment and its resources.	
Sports	Football	Set Piece	A play in football that starts from a specific position, such as a corner or free kick.	
Business	Marketing	Consumer Behavior	The study of how individuals make decisions about which products or services to purchase.	
Education	Teaching	Formative Assessment	A type of assessment used by teachers to monitor student learning and provide feedback during the learning process.	
Psychology	Behavior	Reinforcement	A process that increases the likelihood of a behavior being repeated.	
Philosophy	Logic	Inference	The process of deriving conclusions from premises or evidence.	
Geography	Map	Topography	The study of the physical features of a landscape, such as mountains, rivers, and valleys.	
Art History	Painting	Expressionism	A style of painting that emphasizes the artist's emotional experience over realistic representation.	
Science	Physics	Momentum	A property of a moving object that is the product of its mass and velocity.	
History	World War II	Resistance	The active opposition to an occupying power or oppressive regime.	
Language	Grammar	Preposition	A word that shows the relationship between a noun or pronoun and other words in a sentence.	
Art	Painting	Texture	The visual quality of a surface, which can be created through various painting techniques.	
Music	Instrument	Scale	A series of notes that are used to create a melody in music.	
Health	Medicine	Antibiotic	A drug used to treat bacterial infections by killing or inhibiting the growth of bacteria.	
Technology	Computer	Network	A system of interconnected computers and devices that can share data and resources.	
Environment	Nature	Renewable Energy	Energy that is derived from natural resources that are replenished over time, such as wind, solar, and hydro.	
Sports	Football	Offside	A rule in football that prevents a player from interfering with the play by being in an advanced position.	
Business	Marketing	Market Research	The process of gathering information about a market or target audience to inform business decisions.	
Education	Teaching	Differentiated Instruction	A teaching approach that tailors instruction to meet the needs of individual students.	
Psychology	Behavior	Stimulus	An event or object that triggers a response or behavior.	
Philosophy	Logic	Conclusion	The final statement or result of a logical argument.	
Geography	Map	Contour Line	A line on a map that connects points of equal elevation.	
Art History	Painting	Abstract	A style of painting that does not represent recognizable objects or figures.	
Science	Physics	Wave	A disturbance that travels through a medium, carrying energy from one point to another.	
History	World War II	Evacuation	The process of moving people from one location to another, often for safety reasons.	
Language	Grammar	Conjunction	A word that connects two clauses or phrases in a sentence.	
Art	Painting	Balance	A principle of design that involves the distribution of visual weight in a composition.	
Music	Instrument	Interval	The distance between two notes in a scale or melody.	
Health	Medicine	Immunization	The process of making a person's body resistant to a particular disease by introducing a vaccine.	
Technology	Computer	Encryption	A process of converting data into a code that only authorized parties can decipher.	
Environment	Nature	Endangered Species	A species of plant or animal that is at risk of extinction.	
Sports	Football	Header	A move in football where a player uses their head to strike the ball.	
Business	Marketing	Competitor Analysis	The process of identifying and evaluating the strengths and weaknesses of a company's competitors.	
Education	Teaching	Classroom Climate	The overall atmosphere and environment of a classroom, which can affect student learning.	
Psychology	Behavior	Observation	The process of watching and recording behavior in a systematic way.	
Philosophy	Logic	Premise	A statement or proposition that is assumed to be true and is used as a basis for reasoning.	
Geography	Map	Topography	The study of the physical features of a landscape, such as mountains, rivers, and valleys.	
Art History	Painting	Impressionism	A style of painting that emerged in France in the late 19th century, focusing on light and color.	
Science	Physics	Momentum	A property of a moving object that is the product of its mass and velocity.	
History	World War II	Resistance	The active opposition to an occupying power or oppressive regime.	
Language	Grammar	Preposition	A word that shows the relationship between a noun or pronoun and other words in a sentence.	
Art	Painting	Texture	The visual quality of a surface, which can be created through various painting techniques.	
Music	Instrument	Scale	A series of notes that are used to create a melody in music.	
Health	Medicine	Antibiotic	A drug used to treat bacterial infections by killing or inhibiting the growth of bacteria.	
Technology	Computer	Network	A system of interconnected computers and devices that can share data and resources.	
Environment	Nature	Renewable Energy	Energy that is derived from natural resources that are replenished over time, such as wind, solar, and hydro.

Цяперці відомі як співрозрядні іони, набуваючи різні іоничні форми в залежності від середовища. Наприклад, в крові іони кальцію знаходяться в основному в формі Ca²⁺, але в кістках вони можуть бути в формі CaHPO₄ або CaCO₃.	В залежності від середовища іони кальцію можуть перебувати в різних формах: Ca²⁺, CaHPO₄, CaCO₃.	В залежності від середовища іони кальцію можуть перебувати в різних формах: Ca²⁺, CaHPO₄, CaCO₃.
